**Have you (or someone you know)  
been diagnosed with mild to moderate  
Alzheimer's disease?**

**If you:**

- ✓ **Are male or female from the ages of 50 to 89**
- ✓ **Are already taking currently available medicines for Alzheimer's disease for the last 3 months.**
- ✓ **Are willing to receive 36 infusions (IV treatments) which may be either an active study drug or a placebo every 2 weeks**
- ✓ **Have a study partner – either a friend or relative who can accompany you to all the visits and answer questions about you**

**This is a 20 month study including 46 total visits lasting from 2-5 hours per visit. Qualified participants will receive infusion treatments or placebo (inactive substance) at no cost (2 out of 3 participants will receive active treatment). MRI brain scans, blood draws, and neuropsychiatric testing (pencil and paper tests) are also a part of this research study.**

**Participation is voluntary, compensation is available.**

**For more information, please call**
