

cognitive decline in oregon

DATA FROM THE 2012 BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM

In Oregon, 12.8 percent – one in eight – of those aged 45 and over report that they are experiencing confusion or memory loss that is happening more often or is getting worse.

Over 68 percent of them have not talked to a health care professional about it.

For those with worsening memory problems, nearly 40 percent say it has interfered with household activities and/or work or social activities.

Portion of last 30 days, on average, people with memory problems experienced . . .

Characteristics of those with memory problems

Disabled	28.4%
In Fair/Poor Health	58.4%
Ever Had Depression	54.3%
Have Trouble Seeing	44.2%
Smoke	16.7%
