K-ADNI Update

November 13th, 2015

Seong Yoon Kim

Update for K-ADNI, since July 2015

- Clinical core
  - Registration started with a MCI subject from Asan Medical Center, but some issues of image transfer and logistics needs to be fixed.
  - 10+ clinical sites are undertaking "site feasibility check-ups" to be included in the clinical site pool. This expansion will expedite the recruitment process of the baseline subjects.

- Other issues
  - Governmental audit (interim review) for the K-ADNI project have been carried out last month, the result
