Join us for an update about the latest art & science of dementia diagnosis and care.

Biomarkers identified with such methods as PET scans and blood tests are becoming important tools in the diagnosis of Alzheimer’s and other dementias. Learn the latest from national and local experts in diagnosis and determining proper care.

Hear from Eric VanVlymen, Director Region 10—MI, OH, WV & Executive Director of the Miami Valley Chapter, as he provides information on the latest Alzheimer’s research that is occurring locally, nationally and internationally.
