

cognitive decline in florida

DATA FROM THE 2022 BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM

In Florida, 10.8% of those aged 45 and older report they are experiencing confusion or memory loss that is happening more often or is getting worse ("subjective cognitive decline").

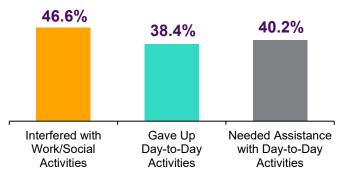

More than 34% of them have <u>not</u> talked to a health care professional about it.

For those with worsening memory problems, 56.6% say it has created "functional difficulties" — that is, caused them to give up day-to-day activities and/or interfered with work or social activities.
