

# #Brain Matters

BIOMARKERS,  
BLOOD TESTS  
& BREAKTHROUGHS:

The Importance of  
Early Testing &  
Diagnosis for Dementia

WEBINAR

JOIN US ON  
DEC. 4 AT 7 P.M. (EST)

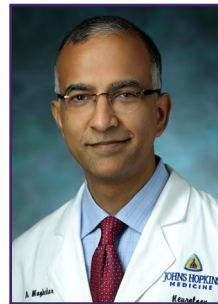

Join us for our Fall #BrainMatters event, which will consist of two short presentations on topics related to blood biomarkers for Alzheimer's disease, as well as the importance of early diagnosis. Presentations will be followed by audience Q&A.

Please register to receive login instructions. Scan the QR code, click [HERE](#) or call 800.272.3900.

## Our Presenters

### ABHAY MOGHEKAR, MD

Dr. Moghekar will discuss biomarkers for Alzheimer's disease, including recent advances in blood biomarkers. He will discuss the context of use and pathway to approval for community use. Dr. Moghekar's biomarker research focuses on establishing standards of use and the discovery of new cerebrospinal fluid biomarkers for the earliest phases of dementia. He also sees patients and has helped develop blood biomarkers that should be available for routine clinical use in 2025.

### HEATHER M. SNYDER, PHD

Dr. Snyder is Senior Vice President of Medical & Scientific Operations at the Alzheimer's Association. She leads the Association's strategic funding initiatives to accelerate promising studies on Alzheimer's and other dementia. Among other top priorities, her work encompasses: brain health and dementia prevention efforts; COVID's impact on the brain; and sex and gender-based research about women's vulnerability for dementia.
